

# Benjamin Woolston

## Electrical Engineer

📍 Brisbane, QLD ✉ [benjamin@woolston.dev](mailto:benjamin@woolston.dev) ☎ 0491 110 438

### Current Career Objective

I am looking for a graduate engineering role, my schedule is very flexible, I can work any required hours. Available for start immediately. I have experience in networking, customer service, sales, programming, IT support and teaching. Additionally, I have experience in high paced office environments, thrive under pressure and am very future focused. My stellar teamwork and problem-solving skills ensure I will fit well into any role.

### Qualifications

**Bachelor of Electrical Aerospace Engineering**, Queensland University of Technology

- Honours Program – 6.2 GPA – Part Time – In Final Year

**Queensland Certificate of Education**, Kenmore State High School

- Certificate II Active Volunteering – OP 2 – Graduated 2017

### Skills

- **Languages:** Python, C, Perl, Java, Shell, MATLAB, Arduino, AutoCAD, AHK
- **Server Domains:** RedHat, CentOS, Ubuntu, Windows Server, MacOS Server
- **Networking:** Routing Protocols, LAN Access Controls, IP addressing & Setup, Physical Network Design and Rack Systems (Routers, switches etc), F5.
- **Tools and Abilities:** OpenAI Suite (GPT-3 research beta, ChatGPT), MS Office, Linux, PCB Design and Assembly, 365 Automation, Soldering

### Experience

**Boeing, Global Trade Control Specialist** (2022 – current)

- Acted as the engineer within the team completing all tasks that included optimization and automation of systems, while also completing trade control specialist specific tasks.

**Telstra, Network Engineer Internship** (2022 – 2023, Internship)

- Optimising SPAM filtering using Python, C, Perl, and Shell Script. Solely undertook 8 RedHat to Ubuntu server replacements for testing to production. Built team automation tools using Python.

**Swyftx, Customer Support Technician** (2021 – 2022, team redundancy)

- Online customer support including cold calling, email, and web/live chat. Top 5% workers. Also developed team automation and macro tools using Python.
